Profile

I'm a web developer with a passion for creating **meaningful** projects that **make an impact**. My experience in domiciliary care has allowed me to explore my compassionate side and helped me develop a **user-centric approach** to problem-solving. Through my background in mathematical studies, I've acquired **analytical thinking** while my innate **creativity** helps me find innovative solutions to complex issues. I enjoy working in a team and believe in the power of **effective collaboration**. I'm excited to keep **developing my skills** while **helping others** at the same time.

Skills

Web Development — WordPress development, JavaScript, TypeScript, React.js, Next.js, Framer Motion animation library, CSS, Bootstrap, MaterialUI, TailwindCSS, semantic HTML, PHP, Node.js, Express.js, MongoDB, Git • **Testing** — Jest, Playwright, Testing Library • **Design** — Figma, Canva, Photoshop, InDesign

Projects

Oct 2023 – present

LIFE GOATS, *Outdoor Community Website (Solo freelance project)*

Live website: https://lifegoats.com

Code: https://github.com/AnastasiaAdamoudi/LifeGoats

My role: I designed and developed a responsive and accessible website that offers a variety of retreats and outdoor events which aim to help individuals connect, and find balance and peace in their lives. I used Next.js, Framer Motion, Open Street maps, Chart.js, TailwindCSS. MVP complete - website updates ongoing as the outdoor community keeps being active.

Achievements & Key Takeaways: Integration of visuals, implementation of an interactive map and line chart 'altimeters', creation of image carousel, dynamic 'schedule tabs' and expandable 'pricing cards'. Focus on user-friendly experience and accessibility. Scalability for future development, designing an efficient folder and component structure for project development.

Dec 2023 – present

LIGHT A BEACON, *Interactive Map Website for the Campfire Network (Team project)*

Live website: https://lightabeacon.org

Code: https://github.com/AnastasiaAdamoudi/InteractiveMap

My role: I developed an app with an interactive map where the users can add their own pins. Initially built as a Node.js app with React.js and Express.js, I migrated it to Next.js to utilise Next's server components and native routing. MVP complete - roadmap in progress.

Achievements & Key Takeaways: Implementation of an interactive map that receives data from an API and a form that sends data to the API. Considered user needs, accessibility, as well as scalability and maintainability of the app. Ongoing communication with the Campfire Network lead regarding the implementation of the app.

Education

2019
Greece

BSc Mathematics, *University of Ioannina*
Developed **analytical thinking** and **programming skills**, which have significantly shaped my present self and career path.

Work Experience

Aug 2024 – present
United Kingdom

WordPress Developer, *PIE Code*
- Working in a supportive team of developers on a variety of projects.
- Using HTML, CSS, JavaScript, React.js, Next.js and PHP, to build block themes and plugins for WordPress.
- Developed an internal Framework for WordPress block theme development.

Sep 2023 – Jul 2024
United Kingdom

Web Developer, *Freelance*
- Collaborating with individuals with a vision, professionals who are embarking on a new journey or owners of established businesses who want to start making their mark online.
- **Tailoring web solutions** to suit the individuals' unique needs and aspirations.

Mar 2023 – Jul 2023
United Kingdom

Trainee Full-Stack Developer, *School of Code*
- Entering the bootcamp with a foundation in self-taught HTML, CSS and traditional class-based JavaScript, I learned how to achieve **frontend and backend development**, primarily using React, Node, Express and PostgreSQL via static sites that retrieve dynamic content from RESTful API calls.
- **Pair programming** and **team projects**.
- Adopted a way of **detailed planning** by breaking down complex tasks into manageable chunks to achieve better problem management and efficient problem solving.

Volunteering

Nov 2025
Greece

WordCamp Athens 2025, *Talk: Building Compex Navigation in WordPress Block Themes*
With the intention of **sharing knowledge** and **supporting the developer community**, I presented a talk on **building "meganavs" in WordPress projects**. I explored how block themes enable flexible navigation solutions, comparing custom Gutenberg blocks with tailored core block extensions. The talk combined **real-world examples** with practical insights to help developers choose the right approach for their projects.

Feb 2024
United Kingdom

Basildon Creative Tech Fest, *Organising an online hackathon event*
- With the support of my local tech group *Southend Tech*, I ran the **Social Impact Hackathon** on their weekly zoom meeting.
- I **set the rules and guidelines** and **made sure the event run smoothly**, keeping the participants motivated.

Jun 2023 – Oct 2023
United Kingdom

STEM Ambassador, *Introducing coding to kids*
- Volunteered at **Chelmsford Do and Discover Festival 2023** and **Chelmsford Science Festival 2023: Family Science Days** with my local tech group *Southend Tech*.
- With activities like **Scratch, creating a simple webpage, programming in Python and delving into Microbits**, I showed the kids how interesting and fascinating coding is when you see your project come to life.

About me

- **Oat latte**, **chocolate**, **feta cheese** and **cats** are some of my favourite things in life.
- I enjoy singing in a **choir** and going to **yoga** classes, inspired by communities of people with a common goal.
- **Hiking** in the great outdoors and **gardening** help me connect with nature and find balance in my life.
- Exploring **local history and architecture** feels exciting and meaningful as it helps me understand the world around me.
