Profile

I'm a web developer with a focus on **WordPress** and **Next.js**, and I love creating **websites and experiences with meaning**: ones that **help people achieve their goals**, whether that's growing a business or bringing a personal vision to life. In WordPress I build **custom block themes, Gutenberg blocks and plugins**, and I use **React and Next.js** to build **responsive and accessible apps**. My mathematics degree gives me an **analytical approach** to problem-solving, and years of working in care taught me to put **people at the centre** of everything I build. I believe **sharing knowledge** is one of the most meaningful ways to help others, so I give **talks**, write **tutorials** and volunteer at community tech events.

Skills

WordPress — Block themes, Gutenberg blocks, Interactivity API, PHP, WooCommerce, ACF, plugin development

Frontend — JavaScript, TypeScript, React.js, Next.js, React Native (Expo), semantic HTML, CSS, SCSS, Tailwind CSS, Framer Motion, Leaflet

Backend & tools — Node.js, Express.js, SQL, MongoDB, Supabase, Git, GitHub Actions

Projects

- Oct 2023 – present **LIFE GOATS**, *Outdoor community website (solo freelance project)*
Live website: lifegoats.com · **Code:** github.com/spiralnebulam31/LifeGoats
My role: I designed and built the website for Life Goats, the outdoor community I co-founded with my lifelong friend. It presents our retreats and outdoor events, which help people connect and find balance in nature.
Highlights: An interactive map of key locations, elevation charts, an image gallery, a dynamic schedule and expandable pricing cards. It's responsive and accessible throughout, with a component structure built to grow alongside the community.
- Oct 2024 – Dec 2025 **GREEK ART MAP**, *Bilingual mobile app for x.art.es (collaboration)*
Code: github.com/spiralnebulam31/greek-art-map · **Article:** LinkedIn · **Demo:** YouTube
My role: In collaboration with another developer, I turned x.art.es, an existing project that maps where Greek artists, writers and composers lived and worked in Athens, into a React Native app. The app has an interactive map of Athens, curated walking routes with stop-by-stop navigation, and bilingual Greek/English artist biographies. We delivered a working prototype the project can keep building on.
Highlights: My first React Native and Expo app, including native map and location features that needed custom development builds. A CSV-to-TypeScript data pipeline lets content be edited in spreadsheets instead of code. Full Greek/English support and light/dark themes, with saved preferences. Worked closely with the project's founder throughout.

Education

- 2019
Greece **BSc Mathematics**, *University of Ioannina*
Built the **analytical thinking** and **programming foundations** that led me to web development.

Work Experience

- Aug 2024 – present
United Kingdom
- WordPress Developer, PIE Code**
Junior WordPress Developer Aug 2024 – Aug 2025, promoted to WordPress Developer Aug 2025
- Build custom **block themes, Gutenberg blocks and plugins** for clients across many sectors, using PHP, JavaScript, React, SCSS and the Interactivity API.
 - Created PIE Code's **block theme framework**: a reusable foundation of theme configuration, patterns, custom blocks, and block extensions and variations that the team builds its projects on.
 - Develop **WooCommerce** features and integrations, such as an accounting integration with FreeAgent and a product waitlist.
 - Deploy to staging and production through **GitHub Actions** workflows, with a focus on accessibility and performance.
- Sep 2023 – Jul 2024
United Kingdom
- Web Developer, Freelance**
- Worked with people who had a vision: professionals starting something new and established businesses ready to make their mark online.
 - Delivered tailored websites such as **Life Goats** and **The Golden Keys** (taxrysakleidia.gr), a multi-page Greek-language site for a locksmith business in Thessaloniki.
- Mar 2023 – Jul 2023
United Kingdom
- Trainee Full-Stack Developer, School of Code**
- An intensive bootcamp in **full-stack development** with React, Node.js, Express and PostgreSQL, building apps powered by REST APIs.
 - **Pair programming** and **team projects**, including the final full-stack project, **Garden Genie**.
 - Learned to break complex work into manageable pieces through **detailed planning**.

Speaking & Community

- Apr 2026
United Kingdom
- Chelmsford Tech Meetup, Talk: Building Websites with WordPress**
An introduction to building websites with WordPress for the local tech community.
- Nov 2025
Greece
- WordCamp Athens 2025, Talk: Building Complex Navigation Menus in Block Themes**
I explored how to build “**meganavs**” in WordPress block themes, comparing custom Gutenberg blocks with extensions to core blocks. I used **real-world examples** to help developers choose the right approach for user experience, flexibility and performance.
- 2026
- Block Theme tutorial series, LinkedIn**
A series of practical tutorials on building WordPress block themes.
- Jul 2024 – present
United Kingdom
- Southend Bach Choir, Volunteer web manager**
Took over and maintain the choir's existing WordPress website: learning a site built by someone else and keeping it running smoothly.
- Feb 2024
United Kingdom
- Basildon Creative Tech Fest, Hackathon organiser**
With my local tech group, *Southend Tech*, I ran the online **Social Impact Hackathon**. I set the rules and made sure the event ran smoothly.
- Jun – Oct 2023
United Kingdom
- STEM Ambassador, Introducing coding to children**
At the Chelmsford Do and Discover Festival and the Chelmsford Science Festival, I introduced children to coding through Scratch, simple web pages, Python and micro:bits.

About me

- I feel deeply connected to nature and to my inner self, and I believe doing what you love gives life its meaning. For me that's **yoga, hiking, stargazing, exploring new places** and singing with the **Southend Bach Choir**.
- If I can help people love what I love by doing what I love, why not? That's why I give **talks** and write **tutorials**.
